

GENOA CLOUD FOR COLLABORATIVE VIRTUAL TESTING (CLOUD FOR CVT)

GENOA Cloud is an add-on package that allows users to use GENOA through the internet using a remote-client framework. It allows GENOA to be installed on a central server (requiring only one installed license with single or multiple job privileges) where multiple users may simultaneously login and perform analysis jobs. The clients do not need to install GENOA on their client workstation and only require a common internet web browser (Chrome, Firefox, Internet Explorer, etc.) to access GENOA. This may be helpful for environments where multiple GENOA licenses may be difficult to install or for remote users wishing to access GENOA from remote geographical regions. GENOA Cloud may be customized for an internal private corporate intranet or to the outside public internet.

- ✓ **Allows GENOA users/engineers to remote access a central server through an internet browser.**
- ✓ **Creates user accounts, monitors analysis jobs, and records logs of user logins and analysis runs.**
- ✓ **Ideal for customers to use GENOA within their own intranet and for remote purposes.**
- ✓ **Utilizes web server to monitor GENOA GUI usage as Java applet through client browser.**
- ✓ **Upload/Download files and models through web server interface.**
- ✓ **Supports internet browser from any platform (UNIX, Windows, Linux, Safari, etc.) that supports Java & Java3D plug-in.**
- ✓ **Includes Documentation and Step-by-Step Tutorial Example.**
- ✓ **Cross-platform capability such as Windows client accessing Linux server, Linux client accessing Windows server, etc.**

Key Benefits

- Monitors analysis jobs
- On central server with access through internet/intranet
- UL/DL files through web interface
- Supports all browsers

System Requirements

- Requires GENOA Standard Edition to be installed on CVT server for analysis.
- Windows XP/Vista/7/8 or Linux (64-bit)
- Java 1.7 minimum Runtime Libraries
- Java3D 1.5
- Tomcat Web Server
- Java Derby Database

Minimum Configuration

With the minimum configuration, performance and Functionality may be less than expected.

- 1 GHz or higher CPU, 4GB RAM, 10GB disk space
