

PRESS RELEASE

## AlphaSTAR Adds Qantur Technologies as UAE and India Channel Partner

**LONG BEACH, CA and GURUGRAM, INDIA (March 13, 2018)** – AlphaSTAR Corporation announced today that it has signed a value added reseller agreement with Qantur Technologies, based in Gurugram, India. The agreement enables Qantur to resell AlphaSTAR’s simulation toolset for advanced materials, GENOA and MCQ.

Qantur Technologies was founded by a team of experienced engineering professionals who are passionate about contributing towards the needs of the engineering community by providing world class and innovative solutions. Its interest is to work closely with simulation end users across industry sectors who are engaged with aspects of single domain, multi-physics, and multi-scale simulations. The sectors supported include simulation technology providers, researchers, and academia that are engaged in the area for development, manufacturing, lifecycle support and management of systems and subsystems.

“Qantur Technologies is delighted to announce its partnership with AlphaSTAR” says Irfan Ashai, Managing Director of Qantur Technologies. “Partnering with AlphaSTAR will help us to diversify our simulation portfolio and address the significant need for customers who want to go beyond their core FEA solver results.”

“With the ever growing need for advanced material analysis, we are looking forward to the value add that Qantur Technologies brings as part of our extended team. As we expand our reach into key regions and leading industries, we are eager to show that our software toolsets have the potential to revolutionize the way engineers alike solve their challenges.” said Kay Matin, President of AlphaSTAR.

Qantur and AlphaSTAR are focused on providing a superior simulation solution to end-users in the emerging and ever-growing markets of the UAE and India.

**About Qantur Technologies:**

Qantur Technologies is headquarter in Gurugram –India and is an authorized distributor of engineering simulation products and services in India, Srilanka, and Bangladesh for ANSYS and AlphaSTAR.

**About AlphaSTAR Corporation:**

AlphaSTAR Corporation is a leading engineering services and software company that provides innovative physics-based simulation technologies for additive manufacturing, structural modeling and analysis of advanced composite structures in the aerospace, automotive, defense, and energy industries worldwide. As a solution provider, AlphaSTAR partners with Altair, ANSYS, MSC Software, DS Simulia, and LSTC. AlphaSTAR is headquartered in Long Beach, California and is the recipient of esteemed industry and technology awards for R&D and software development.
